The DM2010 and DM2015 are designed to provide the installer with a quick, secure and reliable camera option for fixed and zoom cameras.

Ideal for any application, the robust, IP66 rated die-cast Aluminum housing provides the camera with the necessary protection from a demanding environment.

The internal camera cavity is simply accessed by loosening 2 screws with cable conduits led out through either full or semi cable managed bracketry.

Both housings are designed to operate for either 12VDC to 24VAC or 110VAC to 230VAC.

The 2015 has been designed to provide all the features of the 2010, but the increased capacity makes it possible to incorporate a wider selection of zoom cameras. The optional wiper module adds increased functionality to meet the demands of a high specification installation.

So not only do they look good, the 2010 and 2015 are designed to reduce installation times at a competitive price.
